PROFESSIONAL SUMMARY

Information Systems undergraduate (UFMS) and IT Technician (IFMS) with 1 year of hands-on experience developing and maintaining a Java desktop management system (Swing and JDBC) integrated with a relational database. Experienced in debugging SQL queries, implementing CRUD operations, role-based access control, LGPD data masking, and OOP component standardization, complemented by software projects in Java and REST APIs with Node.js and SQLite.

TECHNICAL SKILLS

Programming Languages:	Java, JavaScript, C#, Python
Databases & Data Access:	SQL (MySQL, MariaDB, SQLite), JDBC (PreparedStatement), Relational Modeling
Frameworks, Libraries & Testing:	Java Swing, JavaFX, Node.js, Express, Jest, Supertest
Software Engineering & Tools:	Object-Oriented Programming (OOP), DAO & MVC Patterns, UML, Git, GitHub

PROFESSIONAL EXPERIENCE

Software Development Intern March 2025 – April 2026

UFMS Psychology Clinic — Corumbá, MS, Brazil (Remote)

- Restored broken create, update, and delete (CRUD) operations in the clinic's Java (Swing/SQL) desktop application, tracing and fixing the faulty SQL update statement that blocked record persistence.
- Implemented logical deletion (*soft delete*) to preserve clinical record history and role-based masking of sensitive patient data in the UI for researchers under LGPD privacy restrictions.
- Built search filters scoped to the authenticated user, refined role-based permission checks, and replaced raw boolean flags (`true/false`) with clear status labels ("Yes/No") across tables.
- Fixed a UI refresh bug that recreated Swing panels with broken dimensions and engineered a reusable custom button class to standardize styling and dimensions across the system.

IT Support & Helpdesk Intern September 2023 – November 2023

Embrapa Pantanal — Information Technology Center (NTI) — Corumbá, MS, Brazil (On-site)

- Diagnosed and rolled back a faulty Windows update that blocked local user authentication on workstations, performed workstation and UPS (no-break) maintenance, and assisted with a server OS upgrade.

SOFTWARE DEVELOPMENT PROJECTS

AgeCon — Contact Management System (github.com/BenevidesLuiz/AgeCon) Java, Swing, JDBC, MySQL / MariaDB

- Desktop application architected into `model`, `dao`, `controller`, and `view` layers, using Java interfaces (`InterfaceDao`, `InterfaceControle`) to enforce persistence and controller contracts.
- Implemented full CRUD and parameterized search (`LIKE`) via JDBC `PreparedStatement` over a normalized relational schema (`contact`, `city`, `district`, `contact_type`) with foreign-key constraints and input validation.

Movie Catalog REST API (github.com/BenevidesLuiz/atividadesweb) JavaScript, Node.js, Express, SQLite, Jest

- Layered back-end API (`routes`, `controllers`, `services`, `repositories`, and `models`) with parameterized SQLite persistence (`better-sqlite3`), payload validation, and HTTP error handling (400/404).
- Implemented session-based authentication (`express-session`), route-protection middleware, and automated unit and integration tests using `Jest` and `Supertest`.

MusicPlayer — Desktop Media Player (github.com/BenevidesLuiz/Player-de-Musica) Java (JDK 25), Swing, JavaFX, yt-dlp, ffmpeg

- Java desktop application combining Swing and JavaFX (`MediaPlayer`/`MediaView`) for `.mp3`/`.mp4` playback, integrating external CLI tools (`yt-dlp` and `ffmpeg`) for automated media download and format conversion.

EDUCATION

Bachelor of Science in Information Systems (B.S.) Expected Graduation: 2027

Federal University of Mato Grosso do Sul (UFMS) — Pantanal Campus

- **Relevant Coursework:** Databases (relational modeling, SQL with `INNER JOIN`, `GROUP BY`, `HAVING`, and index trade-off analysis), Object-Oriented Programming in Java (OOP), Systems Modeling (UML), and Web Programming (REST APIs).

Technical Diploma in Information Technology 2021 – 2023

Federal Institute of Mato Grosso do Sul (IFMS) — Corumbá Campus

- **Capstone Thesis:** *Blockchain: An Exploratory Study on Crypto Asset Digital Wallets* — technical analysis of elliptic-curve cryptography (`SECP256K1`), hash functions (`SHA-256`, `RIPEMD160`), and deterministic wallet standards (`BIP-32/38/39`).

LANGUAGES & ADDITIONAL TRAINING

- **English:** Golden 1 Level (Upper-Intermediate / B2) — CNA Language School (technical reading, writing, and conversation).
- **Java Development:** Complete Java Object-Oriented Programming + Projects (Udemy — Prof. Nélio Alves) and Java Swing for Desktop Applications.
